Abstract of JP2002366317

PROBLEM TO BE SOLVED: To surely cancel a print job. SOLUTION: When cancel of a job is requested from an application 11, deletion of the job is reserved by a management table in a printing system 12 in the case that the job is not registered in a job queue of a printer 13. When the printing system 12 receives a job generation event from the printer 13, it is discriminated whether a job included in this event is the job of which the deletion is reserved or not, and the job is deleted in the case where it is the job of which deletion is reserved.
